ES 112.02/04 Homework #3
Fall 2003-2004

Date Formatting and Printing

This time your task is to make the computer take a date given in "number" format, as "DD MM YYYY" (e.g., "15 10 2003"), and make it print the same date in "readable" format (e.g., October 15th, 2003).

Sample input output pairs would be as follows:

Number form	Readable form
15 10 2003	October 15th, 2003
1 1 2001	January 1st, 2001
31 12 2004	December 31st, 2004
2 3 2000	March 2nd, 2000
11 5 1999	May 11th, 1999

A sample run would look like:

```
Please enter a date in the form DD MM YYYY: 22 10 2003
October 22nd, 2003
```
